8 Advantages of Amazon's Alexa as a Free Home Automation System If you're looking to control your home's lights, thermostat, and connected home devices from the comfort of your couch, Amazon's Alexa may be the perfect solution. In this post, we'll be looking at the advantages of Alexa as a free home automation system. It's been a long time since I've written about home automation. In fact, I've never actually written about home automation. When Amazon introduced its Alexa voice service, I wasn't even aware that it could be used for home automation. My home automation experience is pretty limited to my garage door opener and my thermostat. That's it. Well, that may change. After an Amazon Echo Dot was in the house for a few months, my wife and I decided we were ready to get into home automation. There are a number of advantages of Alexa as a home automation system. If you're looking to get into home automation, you should definitely check them out. But, before we start, we need to be clear. We are not talking about "multi-room audio." This is not about streaming music. These are not speakers that you have connected to your Alexa device. This is about controlling your home's devices. This is about using Alexa to control your thermostat, your lights, your garage door opener, and more. Can I use an Amazon Echo as a Free Home Automation System? Amazon's Alexa is a free voice service that gives you access to a number of features, many of which are related to your home. Amazon gives you full access to your Alexa-controlled devices, and you can control your connected home devices with your voice. There are three main ways to use Alexa for home automation: with a smart speaker, using the Alexa app on your smartphone or tablet, or using the Alexa Skill (more on this later) The main advantages of using Amazon Alexa for home automation are: Control your devices with your voice. You don't need to use a smart speaker to use Alexa, you just need an Echo Dot. You can use a Siri or a Google Home, but you'll need to use them to control your home's devices. You can use your voice instead. . You don't
