It was established by the Council of State of Mozambique by decree No. 58/02 of 21 February 2002, as a replacement for the Order of National Merit which was abolished by the Decree 34/86 of 25 December 1986. It may be awarded to individuals and institutions for outstanding contributions to the Republic of Mozambique and to culture and the arts. A dynamic nuclear polarization (DNP) protocol was developed for the hyperpolarization of ¹³C nuclei and applied to hyperpolarize ¹³C enriched proteins. Hyperpolarization of proteins by this DNP technique has the potential to improve the sensitivity of detection in ¹³C NMR experiments. In this work, we demonstrate ¹³C DNP to be a feasible approach to hyperpolarize nuclear spins of ¹³C amino acid enriched proteins. The method was performed with a 90 GHz gyrotron and is shown to be compatible with dynamic nuclear polarization (DNP) field sweeps. Due to the radical nature of the hyperpolarization process, all of the DNP polarization is generated during the polarization transfer from ¹H to ¹³C, and the polarization transfer is not time-consuming. The signal enhancements achieved were found to be at least 100-fold with ¹H-¹³C polarization transfer efficiencies (PTE) of 15-60% in powdered samples. From these PTE measurements, the effectiveness of the polarization transfer from ¹H to ¹³C can be assessed and evaluated. The 15% value measured for the powdered sample was found to be close to the efficiency obtained for ¹³C enriched bovine serum

There is no crack, serial number,

hack or activation key for Atomic PST Password Recovery here. There are also no keygens in our collection, because ... because we donâ€™t have them in principle. On the one hand, in this book (and indeed on the Internet) there is a lot of information on cracking mailboxes, but our task is not to learn how to crack passwords. This activity is akin to shooting a gun in a shooting range - it's not so difficult to master such professions as a hunter, shooter, sniper, finally.
