Metal oxide nanoparticles have been widely used in agriculture, environmental applications, and healthcare. It is necessary to search for new nanoparticles with the high biocidal activity. Due to their high biocidal activity, organic-inorganic hybridized metal oxide nanoparticles with different properties have been synthesized successfully and used for the first time as a novel type of environmentally friendly biocides. At the same time, a comparative study of their biocidal activity and mechanism was performed. Hybridized Al₂O₃-CuO, Al₂O₃-Fe₂O₃, Al₂O₃-ZnO, Al₂O₃-MgO, and Al₂O₃-Bi₂O₃ hybridized metal oxide nanoparticles were synthesized, and their biocidal activity was detected by bacterial tests. The results show that the synthesized Al₂O₃-CuO and Al₂

In 2017, India was the United States' second-largest trade partner in the world. India is the United States' third-largest source of foreign direct investment. The Narendra Modi government has attempted to improve India's relations with the U.S. after the Obama administration and tried to get a waiver for American citizens to buy cheaper medicines. India has the third-largest population in the world with more than 1.3 billion people, followed by China and Brazil. Indians began immigrating to the United States in the early nineteenth century. After World War II, the Indian population of the U.S. grew considerably due to a large number of migrants from the Indian subcontinent, mostly from the Indian states of Tamil Nadu and Andhra Pradesh, as well as many from the Punjab region. According to a 2019 report by the Brookings Institution, there were more than 8 million Indian-Americans in the United States 2d92ce491b
