Field of the Invention The present invention relates to an apparatus for sensing articles and counting them, and more particularly, to a reliable, low-cost article counting apparatus, such as for counting fish, which can be used for a variety of applications. 2. Description of the Prior Art In the fishing industry, automatic fish counting devices are commonly used for counting fish in order to calculate the price of fish caught. In recent years, as the fishing population is dropping, there has been a need for a reliable fish counting apparatus which can be quickly and easily used and which is relatively inexpensive. Numerous fish counting devices have been provided in the prior art. For example, U.S. Pat. Nos. 1,170,744; 3,226,827; 4,523,316; 4,706,367 and 4 f3e1b3768c
