The problem is that all arguments to strftime can be found in "%" but for "%Z" this format is used for showing the time zone abbreviation (for example, "CET"). How to convert this argument into a format with just "C" or into "GMT"? Some data 24/01/2017 12:14:38 Function value=mysql_fetch_assoc($sql); format('%d/%m/%Y %T','value', "%Z"); Output 25/01/2017 %T I don't want to use a $precision and $width, if possible. EDIT Is it possible to use "E" in the format? A: You can find the timezone value in your resultset, just use it with %Z.

GamesA new multi-channel nonlinear biomodulation system for assessment of nonlinear electro-biomodulation of human heart. The nonlinear biomodulation (NBM) system with multi-channels (8 channels) was developed. The application of 8 channels was validated by analyzing the dependence of the simultaneous bioelectrical activity of the myocardium on the position of the positive electrode. The cardiac indices were simultaneously measured in the right atrium by right ventricular leads and an electrograms by the non-polarizable Ag-AgCl electrode placed on the right atrial free wall. The use of the polarization resistance of the electrode and the bioelectrical activity of the myocardium enabled the correction of the measured impedance. The NBM system made it possible to study electro-biomodulation of myocardium in a safe way, without inducing phasic disorders and, thus, realizing a study on the peculiarities of the resting heart. 2d92ce491b
