
The bitcountset.y is a program which reads a number of 4 bit binary numbers and determines the size of the respective bitfields. For example, the first bitcountset.y-file should be able to count all values in the range of 0 to 15. The second one can count from 16 to 31 and so on. The macro facility can be used for generating the gzip and uuenc-compliant encoded representation of the values of the respective bitfields, e.g. for bitfields of width 4, with values 0 to 15, 8 bytes are required for 32-bit values and 4 bytes are needed for 16-bit values. Libraries: This module was tested with: GNU assembler and linker versions 2.20 and 2.30. sed versions 2.05 and 2.11. Permission is granted to use this module in software for any purpose as long as the copyright notices and this notice are retained. See the file NOTICE for GNU assembly/sed changes. (C) 1999.1.1 By A. Kähler, B. Swillens Technical University of Darmstadt Technical University of Darmstadt, Germany Red Hat, Inc.Q: If $a+b+c=0$, then what is the maximum value of $ab+bc+ca$? If a,b,c are any positive real numbers such that $a+b+c=0$, then what is the maximum value of $ab+bc+ca$? A: It is obtained by choosing the numbers a,b,c to be proportional to the sides of a cube. For instance, let $a=b=c=\frac{1}{3}$. Then $ab+bc+ca = \frac{1}{9} \implies \frac{1}{9} \times \frac{1}{3} \times \frac{1}{3} + \frac{1}{9} \times \frac{1}{3} \times \frac{1}{3} + \frac{1}{9} \times \frac{1}{3} \times \frac{1}{3} = \frac{8}{9} \times \frac{1}{9} \times \frac{1}{9}$ 70238732e0

***** Introducing
Floresoft TextCompare. Do you need to compare text, xml, csv files and folders? What about file and folder content? The easy-to-use Floresoft TextCompare is the easiest way to do it! Features: - Compares multiple files - Compares text, xml, csv and text files - Compares folder content - Uses file attributes - Highlights the changes automatically - Generates a customizable

report - Compares files and folders in seconds - Lets you create reports from the data automatically - Compares, merges and exports files - Compares text files (ascending and descending) - Compares the same files/folders in different order - Compares the same files/folders in different data formats - Compares the same files/folders with regular expressions - Compares the same files/folders with rules - Compare binary files - Compare image files - Compare video files - Text comparison for lines, characters, words - Compares strings - Compares the same files/folders with the same background color - Compare 2 pages of a file/folder and marks the changes - Supports HTML documents - Compares multi-byte languages - Sorts files and folders - Various output formats - Supports merge
