A teacher who says she actually teaches Common Core standards would not be doing the job. Teaching literacy skills is what it's about. Reading Explorers presents the literacy standards in action. Based on the principles of the Common Core Standards for Literacy and the National Read and Spelling Outreach Program, Reading Explorers is a six-level, literacy-focused series designed for students from Pre-K through 6th grade . The Real World This reading series fosters a whole set of skills with a focus on vocabulary, comprehension, and higher-order thinking skills such as analyses of nonfiction texts. . The Reading Explorer series contains four different books, each with a different approach to introducing the following essential literary elements: vocabulary, narrative, comprehension, and analysis. . Reading Explorers contains a comprehensive set of reading strategies and tools, including: a range of graphic organizers, multiple choice and true/false questions, peer-peer discussion and role-playing, and a variety of hands-on practice exercises.
