A hard disk drive is a data storage device which has become ubiquitous in modern society. Typically, a hard disk drive includes a magnetic storage disk on which data are written and from which data are read, an actuator arm which supports the magnetic head above the disk, and a motor which rotates the actuator arm. Many systems interface the hard disk drive to other storage devices, other computer devices, and networks. In this case, the hard disk drive is referred to as a xe2x80x9cdata storage devicexe2x803ef4e8ef8d
