Autodesk Exchange Apps There are more than 1000 apps for AutoCAD, Autodesk AutoCAD LT, Autodesk AutoCAD R14, AutoCAD Architecture, AutoCAD Electrical, Autodesk Navisworks, Autodesk Navisworks Mobile, Autodesk InfraWorks 360, Autodesk AutoCAD Professional, Autodesk MEP Process Manager, Autodesk Civil 3D and Autodesk Inventor. An AutoCAD app is a third-party application written in any language and can either be standalone or work within the AutoCAD environment. Apps are mostly third-party applications. Applications AutoCAD and AutoCAD LT are commercial, proprietary applications developed by Autodesk. On the other hand, Autodesk Software Architect supports the creation of applications for free, without the need to purchase the software, by providing a set of components and a framework that allow designers to create different types of applications, including software tools, spreadsheets, and Web-based. Navisworks is an application for civil and transportation engineering designed by Autodesk. Autodesk Inventor is a model-based design and

collaboration platform with engineering and manufacturing capabilities, while Autodesk Revit is an integrated platform for building information modeling. AutoCAD Architecture is an architectural design tool with the ability to produce and manage a library of 3D models, as well as a database of drawings for architects and design professionals. AutoCAD Electrical was launched in April 2011 and includes architectural, mechanical, and civil engineering applications. AutoCAD 3D Mechanical was released on April 13, 2012. AutoCAD 3D Civil was released on October 16, 2012. AutoCAD Architecture 2019 was released on July 1, 2019. Access AutoCAD LT and AutoCAD are available on most major platforms, as well as on the Cloud, through the Autodesk Store App. Autodesk Exchange Apps are developed by Autodesk, and are available for multiple operating systems. Access to AutoCAD is also available on mobile devices, allowing users to create and edit drawings, and access to all key functions and features. Archiving AutoCAD archiving is a process of retaining all of the information in the drawing that is created or modified during the course of its use. Archiving can be done by exporting drawings to a file format that is not affected by the drawing or model being archived, or
