**FinalRecovery With Key**

**KEYMACRO** is a computer  
security program designed to keep

---

your Mac protected from cyber criminals. This software works on the premise that, if your MAC address is known to a hacker, it is much easier to hack into your system. The tool can change your MAC address or remove it altogether. It's recommended to change your MAC address or remove it. The program only changes the MAC address and not the hostname or IP address. PC Image Recovery 1.1.7 PC Image Recovery is a free application that allows you to restore lost, deleted or corrupted PC Images with just a few clicks. It supports all versions of Windows OS and can be used to scan from local computer, from a FTP or SFTP site, from a CD/DVD drive, from a memory

---

card or from a USB device. PC Image Recovery is a very easy to use tool that can scan your computer and fix your corrupted PC Images. If you like the tool, please consider buying the full version to keep it safe and support the developers. PC Image Recovery is an updated version of an old tool named Image Recovery 1.0.9. The program offers full support for Vista and Windows 7 operating systems. - Get all the files that were deleted from your computer. - Restores the files that were damaged due to accidental deletion, virus infection or hard drive formatting. - Recovery of files from any type of memory cards (such as SD cards, Compact Flash cards, Memory Stick, etc.). -

---

Get the list of deleted items from Windows recycle bin. - Find all the backups of your Windows registry files. - Find all the backup files. - Find all the programs installed on your computer. - Find all the files and folders created during installation of applications or operating systems. - Find all the installed drivers and components (such as the BIOS, Windows Update, etc.). - Find all the backup files. - Recover the lost files and folders on your local hard drive, FTP site, CD/DVD drive, memory card or USB device. - Find all the backup images of the important data. - Search for backup images on your FTP server. - Search for the lost backup images on the CD/DVD drive. - Quickly scan

---

your Windows registry files and find all the missing files. - Find all the backups of your Windows registry files. - Recover the lost files from the Windows recycle bin. - Get a list of your files, lost or removed, 77a5ca646e

FinalRecovery is a software utility developed specifically to aid individuals in recovering information from the HDD, USB units and SD cards and so on, as well as view details about your PC's health. Hassle-free setup and structured interface The installation process does not last very long, as it does not offer you to download any third-party products. Once you are done with it, you come face to face with a pretty well-organized and clean GUI, as it consists of a menu bar, several buttons and a few panes which enable you to view all detected data, a folder structure and HDD properties. In addition to

---

that, extensive Help contents are supported thus ensuring that all types of users can find their way around it, regardless of their previous experience with the IT world. Types of scans to take advantage of This tool offers two types of scans, so that you can find the files that interest you. To be more precise, you can choose between a standard method and a more advanced one. While the first enables you to find most deleted items, the latter lets you retrieve files and formats from formatted volumes and deleted or lost partitions. View retrieved files and a few details regarding them All recovered items can be viewed in the main window as a folder structure, as well as a list, along

---

with details such as name, extension, status, size and modified date. You can also bring up further properties, view the hex algorithm and save it to the computer, display logs in a separate pane and save them to the HDD in a LOG format. Check your HDD's condition A search function is also integrated and you can create a drive image using a DIF file extension, with just a click of the button. S.M.A.R.T. attributes for your hard disk can be brought up, so that you can easily check the health of your computer.

Conclusion To sum up, FinalRecovery is a pretty efficient piece of software, dedicated to both power and novice users, interested in retrieving important

---

data that has been lost or deleted. All jobs are completed in due time, yet you should know that the CPU and memory usage can be quite high at times. There are sufficient options to keep you busy for quite a while and our tests did not register any errors or bugs.
