2013, AutoCAD was discontinued as a native MacOS app. With the advent of macOS Catalina, in September 2019, Autodesk released a new version of Autodesk CAD titled Autodesk AutoCAD Architecture, Autodesk AutoCAD Electrical, Autodesk AutoCAD Civil 3D, Autodesk AutoCAD Land Surveyor, Autodesk AutoCAD Landscape and Autodesk AutoCAD Plant 3D for macOS. It is based on the Autodesk 3D Warehouse platform and requires that an Autodesk subscription be purchased in order to use the apps. Advanced technical features and customizations AutoCAD introduced advanced technical features, such as trackpad scrolling in 2D and 3D, snapping, measurement units, and data zooming. Some of these features were adopted in other products. While still requiring the use of the mouse, its predecessor, AutoCAD R14, introduced AutoCAD key-based functions (such as 5, 10, 50, and 100%) with the addition of Autodesk Pre-Flexor. The Pre-Flexor allows functions such as viewing and copying AutoCAD's native data and drawing information through an interface other than AutoCAD's standard command-line interface (CLI). Interoperability Autodesk releases compatible APIs, drivers, and toolkits for each of the applications that it produces. These are free and open-source software. Some examples of other software that share these compatibility interfaces include: QGIS, PRO/EPM and others. As a vector product, AutoCAD can import and export other vector-based products, such as DWG, DXF, and DWF. Furthermore, Autodesk launched a free download of the Autodesk Vectorworks plug-in for Autodesk AutoCAD in August 2011, which includes an import function to import and save VectorWorks DWF files to AutoCAD. Additional AutoCAD add-ons have been released, which allow it to import and export the following formats: AutoCAD 3DS, AutoCAD 360, AutoCAD DWG 2003, AutoCAD DWG 2004, AutoCAD DWG 2005, AutoCAD DWG

 Launch the AutoCAD File Manager and navigate to the folder in which your AutoCAD installation is located.  Open the program file ``autocad.exe``.  Choose **Options** and then select the **Keygen** tab.  Choose **Read Only (Recommended)**.  Click the **Use Keygen** button.  Enter your e-mail address and the key will be sent.  Wait for the key to be processed.  Once it is processed, select the **Create** button.  Choose **Yes** to continue.  Click **Close** to save the changes.  Close Autodesk Autocad.

 [Determination of thyroid hormones in serum by flow injection analysis]. The authors present a simple and sensitive flow injection analysis (FIA) method for the determination of trace amounts of thyroxine (T4) and triiodothyronine (T3) in biological fluids. The present work reports the influence of the selected volume injection, the flow rate, the flow split and the type of carrier as well as the pH of the carrier solution on the FIA response. The sensitivity achieved is within the range of 1-200 ng/ml for T4 and 10-300 ng/ml for T3. Recovery results were also obtained between 95 and 107%. The selectivity of the proposed method for the quantitative determination of trace amounts of T4 and T3 in the presence of ascorbic acid was evaluated.// Copyright 2012 the V8 project authors.
