Cardis Pharmaceuticals, Inc. said Tuesday its drug TheraCys is the first of its kind approved for skin cancer. The drug is given as a single intravenous infusion. Cardis said the UCB Biopharma Inc. drug works in a different way, entering and remaining in the body for weeks. It is undergoing Phase III clinical trials. The company said it does not expect to know the results of the U.S. trials for at least nine months. UCB said in a release that its drug has been approved in Europe and Japan. Cardis said it has a U.S. approval for the drug to treat skin cancers in patients 17 years and older. The cancer treatment drugs accounted for \$6.1 billion in revenue for the drug industry last year. The past few years has seen a boom in the development of new wireless communication technologies. Many such technologies are based on radio transmission or reception. The quality of a transmitted signal can deteriorate considerably due to the effects of signal propagation and reflection in the vicinity of the receiver. Several receivers with automatic retuning ability exist today. These receivers can be considered as being "blind" receivers in the sense that they are not able to take into account the properties of the communication channel, such as signal reflection in the receiver vicinity, in the determination of the frequency of the transmitted signal. The following document gives some details on an autoranging receiver: IEEE PHONICS LETTERS, VOL. 35, NO. 4, MAY, 1994, "Self-Ranging Bluetooth Phoneline Transceiver", Strand et al. The document "National Instruments Autoranging Receiver Chip for Paging", NRC Project SRC 946, January 2000, ISBN 0738744183, published by National Instruments Corporation, Austin, Tex., describes a so-called autoranging receiver. The document "On Analog Signal Ranging in WLAN Systems", BELGIAN SCIENTIFIC SOCIETY FOR APPLIED PHYSICS, No. MPA010, October-December 2000, Department of Applied Physics, Free University of Brussels, contains a discussion of analog signal ranging. The document "Digital Autoranging Wireless Fidelity System Architecture for ACK/NACK Signal Generation", TECHNICAL 09e8f5149f

It was very easy to rip my entire music library to my iPod so I could use it when I travel. I had to screw up my iTunes because my old iPod died and I lost all my music but i'm going to spend the last few days finishing ripping my library to my new iPod. My first music ripper, I highly recommend it. 0 of 0 people found this review helpful Dr. John D. Walker
