Before you click Activate, make sure that: This program is supported by the User's Windows 10 Computer. You are in priority mode for a new computer. Attention! By installing a program in Windows 7 compatibility mode, you will only have one program available. If you choose Compatibility Mode, be sure to restart Autodesk 2.0 after loading Windows. Before running a program, make sure that your computer only allows one program to run in system priority mode. For Autodesk 2.x to be fully installed and running, it must have activation enabled and be connected to the Internet. Autodesk App for AutoCAD 2010, AutoDesktop for Autodesk, and AutoPlot 5 must be installed and enabled. For Auto3D, you can do without AutoPaint, but such settings are completely integral to AutoCAD and beyond the capabilities of this program. All files included in AutoImage will be loaded and printed in Autodesk. They must first be saved in the Autodesk folder. The Autodesk folder will be created after AutoImage is installed. Extracting drawings from AutoExcels requires AutoISO to be connected. Autodesk Panel activation does not have to be completed, so do not click the Activate button. After turning off Autodesk Projects, all files in the Autodesk directory will be deleted and other programs can be installed in their place. You must remove this file from your system and use it to restart Autodesk. Minimum requirements for AutoCAD 2010 and Autodesk 2010 If the system does not support Autodesk, the product will not be able to install and run the Autodesk software. The Autodesk activation key cannot be connected to Autodesk. Autodesk Carapace cannot be installed in Autodesk. While testing with Autodesk, 1024x768 resolution and 50KB memory errors may occur. After installation, only one document will be available in Autodesk. You can check how well Autodesk supports your system by running Autodesk and Autodesk. Autodesk does not have any advanced features
