### Virtual Chess Clock Crack [April-2022]

Virtual Chess Clock provides a unique way to count your chess gaming hours. Track your training sessions and experience with the 1-click "Reset" function while calculating the number of games and minutes for both players. Play unlimited chess games per day with just one account using multiple time intervals and rankings. The main feature is a timer mode that allows you to set how many minutes or hours you want to play a game. There are two options, a standard mode with 60 minutes per game and another for 20 minutes each. Choose between multiple time formats including fractional minutes, decimal hours, and decimal days. A unique feature of Virtual Chess Clock is that you are always in full control of your time and you won't lose track of it. Choose between players' names that display in the panel and the board both on the side of the timer and in the top right corner. To see the second player just look to the right, if he is in the second row. The most convenient modes are the classic ones with 3, 10, 20, 30, 45, 60 and 90 minutes per game. You can count your training hours by configuring the timer. Simply set a time interval before each game and Virtual Chess Clock will do the rest. The counter is divided into days, weeks, months and years, and is updated as you go. The interface is clean and compact and easy to use. To change settings you can go to the Settings menu at the top of the panel. You can select the time format for both players, choose to display a second row of players, the players' names, both on the left and right sides of the timer panel. Finally you can choose to hide the timer panel. The timer panel is displayed in the top right corner of the screen and the rows are divided into minutes and hours. You can switch between minutes and hours by looking to the right, while hours and minutes are merged for both players. Virtual Chess Clock has been designed with professionals in mind. During our testing Virtual Chess Clock did not fail to deliver a perfect user experience, and all our tests have been straightforward and performed flawlessly. ### Virtual Chess Clock Full Version [March-2022]

Virtual Chess Clock is a compact Windows application built specifically for helping you use a chess countdown timer. Although it was developed as a chess clock, you can use it to count your gaming sessions for other board games as well. Intuitive layout You are welcomed by a clean feature lineup where most of the operations can be carried out with minimal effort. Everything is kept as clear and simple as possible, so you can easily time your activities. Configuration settings You are allowed to switch to a full screen mode for a better focus on your work, reset the clock with just one click, pause the timer, as well as swap the players' names and time control parameters. Another notable characteristic worth mentioning is represented by the possibility to select the hotkeys for the left and right players' buttons in order to pause or reset the clock, switch between users, and show seconds only if the time is less than a user-defined value. During our testing we have noticed that Virtual Chess Clock carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not hampered. Bottom line To sum things up, Virtual Chess Clock offers a handy set of dedicated parameters for helping you time your chess gaming sessions. Thanks to its intuitive layout, it is suitable for rookies and professionals alike. Buy It Now Review Policy All review requests will be assessed within two business days.
