Black & White Conversion There are some very easy ways to get a black-and-white (monochrome) look to your images, and each has its own strengths and weaknesses. Conversion to black and white often enhances the drama and impact of a photograph, and also makes the subject more memorable. For example, low-light scenes may be stronger in black and white because the details are less blurred.

Photoshop vs. Elements: How does it work? Just like any other software, Photoshop and Elements use a variety of programs to create photos and other graphics. You can think of these programs as your computer's typical desktop. In Photoshop, there is the main workspace where you create most of your art. The workspace is called the layers, which are just containers. Photoshop Elements uses the main workspace to organize your graphics, but the workspace is different. In Photoshop, you can use the layers to re-work your images. You can re-size, crop, and paint on your image using tools from the layers. With Photoshop Elements, you can use the main workspace to make similar edits to an image. The layers are available when you import images to Photoshop. You can select each layer from the Layers Panel and use those layers to rework your image. You can use the layers to paint over them, reposition them, and add more layers over the layers. In Photoshop, you can drag images around using the tools available. You can also resize or crop them. In Elements, you can resize and crop an image using the tools available on the main workspace. You cannot drag an image around as in Photoshop. Most graphics programs are straight-forward applications. You import an image, edit it, and then save it. Photoshop and Elements are a bit different. You need to learn how to use them, but they give you more power and give you more control over your work than other graphics programs. Photoshop vs. Elements: Photoshop Features The graphics editor that is used by photographers, graphic designers, web designers, and all kinds of graphic artists is Photoshop. It is the most used and most powerful graphics editor. It works for photographers, web designers and Photoshop designers. Support The software has a very large and helpful customer support. I tried query. db.user.find({name : username}) But I get this error. send command failed Error: Invalid BSON size: 10 I know this error related to maxBsonObjectSize = 10mb in config/connection.js Could anybody suggest me correct approach for this problem. A: I think you want to search in the full collection, so a users collection. The error you're getting is because the Mongo documentation says: { $where: selector } Filter documents in the collection matching the selector The query must be a JavaScript expression that returns true or false. If the query is invalid, then the error result is returned. For more information, see $where in the $where operator documentation. Since that's not what you're doing, you can use the $where operator within a custom find() function. var MongoClient = require('mongodb').MongoClient; MongoClient.connect('mongodb://localhost:27017/test', function(err, db) { if (err) throw err; var collection = db.collection('users'); collection

We'll be looking forward to seeing everyone's contributions and hoping that we won't lose anyone to another theme – we've had some non-participants over the years.Categories: Archives The emails do not show how the senator got the reports, although a witness in the case told the court that it was referred to as a "McCarthy list," the Herald reports. In 2010, the question of the senator's ties to Red China was raised in an internal memo prepared for John Cornyn, a Republican senator from Texas. A colleague asked what the office's "climate on China" was, according to the email seen by the newspaper. "We should have been more specific on this issue. Every so often a true believer in the Communist Chinese system visits our office," the colleague wrote, quoting from a list of the senator's "staff members who have relatives in China." "I am careful not to single out Senator McCarthy," the colleague said, "but we know there are others who share his views." A current employee of the senator confirmed the lists being used by McCarthy, saying the senator had amassed reams of documents and contacts through the years to use in that fashion. "Sometimes we got reports from various foreign governments or intelligence organizations, and they were mainly just little compilations of interesting things," the employee said, according to the article. "It was a matter of saving time and trying to find stuff." The former employee said the senator used the documents as a reference point to launch his career in politics. "He would go back through the list and say, 'Oh,
