time you expect a guy is #34 to take over, especially a guy on the verge of 1,000 yards. It's all about the Packers now. They had a chance to win this game on offense, but they didn't take it. Now, they are on the verge of having a losing season. For all the ups and downs of this season, the Packers remain the only team in the NFL with three losses and a 3-9 record. They still have a chance to prove, after five games, that last year's 3-1 start was no fluke. The Giants come to town Sunday night with the season on the line. Matt Cassel and the Kansas City Chiefs have an opportunity to do just that: The Chiefs offense has been smoking lately, and quarterback Matt Cassel has been playing like a long-lost uncle to one of the NFL's top teams. "I'm definitely enjoying playing the game of football right now," Cassel said Tuesday. "I'm having a lot of fun playing with those guys, with those guys playing the system we're running out there. Cassel was really something against the Jaguars, even though the play-calling was a little strange at times. He gave up only two completions for 12 yards and a touchdown in the first half, then was away from the pocket for long stretches while the Chiefs mostly stuck with their running game and protection. "If I had to narrow it down, I'd say our offensive line," Chiefs Coach Todd Haley said. "I told him (Cassel), if you can just get your eyes on the receiver and your eyes on the running
