MSH Delete Files Older Than is a useful and efficient software solution designed to assist you in performing cleanup operations on your computer, by removing documents that are older than a specified date or compressing and moving them to a different location. Clear-cut and intuitive appearance The application features a simple and approachable user interface, its self-explanatory functions enabling you to work with it straight away, without too much trouble. The main window lists existing rules and allows you to run them as needed, with the simple push of a button, or you can edit them to match your exact preferences. Swiftly define your file remove rules and run them whenever you want In order to create a new cleanup rule, you can work with the 'Rule Wizard' component, which helps you define the 'Folders', 'Time', 'Files', 'Action' and 'Name' for each entry, in just a few swift moves of your mouse. As such, you can select which directories you wish to focus on, then configure the items to be matched by 'Modification Time', 'Creation Time' or 'Access Time', being able to only target files that are newer or older than a specified time, date or between a given calendaristic interval. Moreover, MSH Delete Files Older Than lets you choose which documents to process (smaller or greater than a user-defined size, or with a certain name). In terms of management methods, the items can be permanently deleted, moved to recycle bin, as well as moved or copied to a different folder, being able to compress them, if required. After running such a task, you can view a report of its results in a dedicated window, or you can save it to CSV format, to your computer, for future reference. Rules themselves can be exported to XML files. A handy tool for performing file management operations To conclude, MSH Delete Files Older Than is a reliable and straightforward utility that you can successfully use to clean your work folders of obsolete documents, making sure they do not clutter your computer for no good reason.
