Generate random numbers to decide on the raffle draw winner. Choose a number from the available tickets to decide the winner of a raffle draw. Has sound effects to increase the suspense. Does not work for more than 9999 tickets. Is compatible with all Windows operating systems. Overall Raffle Draw Number Generator is a not-so-appealing application that does not provide reliable results. The program has no background options, and it relies on the Win XP timer to produce random

numbers for you, which means that the numbers generated are not truly random. It is easy to use, but the lack of background options and improper results are the two biggest flaws of this utility. 1, 1

Works great for what it does. Advance 3 by Steven Harris Would have hoped for more like a 3.5 or a 4 Buy It 5 by Oscar Mata The program has really poor grammar and spelling. My favorite rating! Advance 5 by Miranda This worked really well. I'm not sure how it would have worked with 10 or more tickets but with only 9 it worked perfectly. in order to decide the winner of a contest or a raffle draw. As you might expect, the application has an upper limit to the amount of tickets it can process at once, and that limit is 9999. To start the draw, all you have to do is head to the Edit menu and select the "Enter draw total" option. This opens a small window inside the application, where you can enter the total number of tickets and begin the draw process. Background sound effects to increase the suspense As the program shuffles the tickets and is about to choose the winner, a sound effect is played in the background to

increase the suspense. Unfortunately, due to occasional bad synchronization, the sound can continue to play even after the draw is complete, even if just for a few seconds, and you do not have the option to deactivate it unless you mute the playback devices connected to your computer. Furthermore, the algorithm used for the random number generation is faulty, since it frequently generates values that are greater than the chosen limit, especially for 4-digit numbers. Background sound effects to increase the suspense As the program shuffles the tickets and is about to choose the winner, a sound effect is played in the background to increase the suspense. Unfortunately, due to occasional bad synchronization, the sound can continue to play even after the draw is complete, even if just for a few seconds, and you do not have the option to deactivate it unless you mute the playback devices connected to your computer. Furthermore, the algorithm used for the random

number generation is faulty, since it frequently generates values that are greater than the chosen limit, especially for 4-digit numbers. This can be caused by the fact that it does not actually come up with a whole random value, it just seems to choose one digit at a time, starting with the lowest units first. Closing arguments Despite having a rather simple idea at its core, Raffle Draw Number Generator fails to properly deliver valid results in accordance with the ticket number settings, which is the main point of a raffle draw in the first place. Even with single-digit

numbers, the application cannot be trusted to generate adequate values unless you repeat the process multiple times. If you are looking for some nifty time-saving software then you are in the right place. Our software suite is filled with tools that will save you some of your time. This product contains a built-in scheduler, a music player and a digital alarm clock. You can even create a custom task that combines some of the features. Most people will agree that having a task management application is very helpful. It allows you to juggle multiple tasks at once. A nice feature

is that you can break up long tasks and have the app run them one at a time. The scheduler can run at scheduled intervals or you can run it manually. This gives you more control over your time. You can start or stop the scheduler, or pause it. This is useful if you are having a busy day. Digital alarm clock is a nice feature because it can also be used to create an alarm. The best part is that it can create your own sounds. The program has a lot of built-in sounds, which are appropriate to your daily use. Wake up to your favorite songs Our digital
