Discan Crack Free

Discan is a simple and small tool that's been specially built to scan designated folders and display the exact size of all the files found in it. Discan is an accessible piece of software that was created with the use of the Java programming language. The utility is a successor of the old and discontinued app named FileScan, which allowed users to scan file contents in order to obtain the size of files without having to load them into a browser. With Discan, it's possible to scan multiple folders by setting the locations of the directories and manually selecting which files to scan. We're sure you'll be happy with Discan as it's very easy to use. A few requirements are necessary in order to run Discan: Free Java Runtime Environment: Discan requires the Java Runtime Environment to be installed on your PC.
