In keymacro, the keystroke recorder is a handy freeware application that enables you to record what you are doing with your keyboard. The application's main goal is to help you to record the important and repetitive tasks you perform during your daily work. Thus, you can review your daily actions later on. The interface of the application is highly intuitive. The 'New' window appears on the left side of the main screen. It displays a list of the available actions to be recorded. You may record a single keystroke, or one or more actions that include a certain keystroke, such as typing a sequence of characters or using the mouse. A toolbar will be displayed on the main window, enabling you to use the different features of the application with ease. This interface presents some shortcut buttons, such as 'Remove' and 'End', to enable you to easily get to the previous and next actions recorded. As mentioned before, the keystroke recorder enables you to record the crucial and repetitive actions you perform during your daily work. This feature is extremely useful if you are studying for a test, trying to master a language or simply trying to reduce the number of steps required for a given task. The keystroke recorder is a tool that can be used in a variety of
