What's New in the SmartText SMS?

Mobile text messaging and e-mail have become widely used ways for communicating with others. However, because of the limitation of SMS content, SMS messages are easily to be confused by recipients. For example, it is hard to write and display rich text contents, text pictures or other files in SMS messages. In order to overcome the limitations of SMS messages, the Mobile Smart Text SMS provides a more convenient way for sending bulk SMS messages, such as: 1. * Group SMS (Group SMS or Group Messaging) The Group SMS allows users to send group messages to multiple mobile phones and/or addresses in a group. Group SMS (also called Group Messaging, Group Messaging System, Group-To-Group Messaging) is a form of group message, composed from a number of recipients (as recipients of the message) to be sent to a group of mobile phone numbers or email addresses. (refer to 2. *SMS Forum, (SMS Forum) Mobile Smart Text SMS provides an onter mobile phone numbers, such as via SMS Forum, an SMS Forum provides an environment to hold a forum for mobile phones, in which users can publish a forum (web address), make replies to messages to a certain mobile phone number. Some of its great features include: * Ability to choose a mobile phone number to use as a message source * Ability to create group messages (Group SMS) * Ability to create and reply to group messages from mobile phones, videos, PDF, MP3, etc) 3. *Outbound/Inbound Messaging (Outbound/Inbound Messaging) Group SMS and SMS Forum offers a way to group mobile phone numbers by name (e.g., women, men, children), mobile phones, land/or the Internet. 4. *Contact Grouping* (Contact Grouping) Group SMS and SMS Forum offers a way to group messages to weel to send out multiple messages to send out multiple messages to mobile phones. It can also be used to send group messages to mobile phones. It can also be used to send group messages to mobile phones. It can also be used to send group messages to mobile phones.
