From Blackberry Duster to a Humble Phone from Geeksphone, we've collected all the amazing smartphones that are available for less than $200. The purpose of the list is to show that you can have a smartphone with many functions (while costing you less than $200) and it can be a perfect fit for your budget. The Blackberry Bold 9900 from Geeksphone is a great little phone, but its $200 price tag is probably a little steep for your needs. We are going to add it to the list, however, to show you the "fun side" of Blackberry, that you might be missing if you are completely fed up with the BlackBerry OS. Don't miss: - When you read the full review How much does the Blackberry Bold 9900 cost? Available from Amazon for $179.99 What's in the box: - Blackberry Bold 9900 - 2AAA battery - Warranty card Is the Blackberry Bold 9900 worth it? If you like the idea of having a Blackberry but don't need to connect to corporate networks, you could give the Blackberry Bold 9900 a try, with a few exciting features. The Geeksphone Blackberry Bold 9900 is the definition of compact. It is only 19.3mm thick, which is the thinnest Blackberry ever. This may seem impossible, but remember that BlackBerry OS is built on a great software platform that is slimmed down to make it as small as possible. The Blackberry Bold 9900 is an excellent smartphone to carry around in your pocket, and it has a smart and unique set of functions that set it apart from other smartphones. It comes with a 3.2-inch screen, which is not much larger than other Blackberries, but is good enough for a smartphone with such a limited screen space. There is also a 1GB SD card, which can be used for apps. In the box, you will also get a 3.5mm headset and a warranty card. You can charge the Blackberry Bold 9900 using any standard 2AAA battery, which is enough to get you by for about a month on a single charge. This is a bit of an expensive smartphone, with a retail price of $179.99, but it can be had for $179.99 on Amazon. We like the fact that the phone includes the 1GB SD card and 3.5mm headset in the box, but we do not like the fact that you have to buy an additional battery. If you are a Blackberry user, and you do not need access to corporate networks, this is a great little phone for you. But if you do need to connect to corporate networks, it's probably not the phone for you. The Geeksphone Blackberry Bold 9900 runs on Blackberry OS. The OS is great, but it is also something of a
