One-Touch Shutdown Free For PC

One-Touch Shutdown is responsible for closing your computer with just a simple click via the system tray icon. The program can also be carried around on a USB flash drive or other similar portable devices. All you have to do is unzip the downloaded archive and the tool is ready to work on any available computer without having to go through an installation process. Simple interface and commands The layout of the application wasn't built to have users stare at it too much. Since it's a utility designed to run in the background, it's overall layout is simple enough to give immediate access to most of its features. All the available commands are about what shutdown actions are set as default when you click the system tray icon, namely 'Shut Down', 'Stand By', 'Restart,' or 'Log Off.' However, a more advanced set of options is available next to the top bar of the main pane. Key features One-Touch Shutdown gives users the ability to exert more control over their computers, where they can force a system shutdown, restart, and logoff session of their machines without having any other tools running in the background. Automatic actions can be triggered using a forced mode in order to make sure the process is carried out successfully. What's more, users can also eject their CD trays and even start their Internet dial-up connection. However, more relevant options are available in the 'Tools' drop-down menu. Users can force the app to run at system startup, set the default one-click action, and select a time limited message. Conclusion One-Touch Shutdown is an effective computer shutdown process companion. It helps you set the default action when clicking the icon in the system tray. Plus, you can program it to turn off your machine at certain time, and the utility is even able to control other system components. ...
