
Download Ppjoy Joystick Driver 0.8.4.6

Set up virtual joysticks by mapping their functions, and then simulate joystick commands using another device, such as a mouse. How to do it? I've heard about this before but I don't know how. I'd like to use VirtualBox to do this (but I don't know how to set it up and I'm not sure if it works for OS X, Windows 7 and Linux VirtualBox lets you do this and you don't even have to install an OS! VirtualBox allows you to have one or more virtual devices in the OS. For Linux, you need to install VirtualBox and download it from their website.
