The first version was released in 1982 and it has since been continuously updated and expanded. The core of the software is AutoCAD, which contains a full-featured DWG (dwg) based 2D drawing and modeling environment and a user-friendly DWF (dwf) based 2D drawing and viewing environment. Additionally, AutoCAD contains features for design review and collaboration, engineering drawing creation, engineering component and assemblies, architectural design, paper-based drawing, web-based drawing, and model-based construction. AutoCAD software has been distributed in CD-ROM, floppy disk, CD-ROM, CD-ROM, and DVD-ROM. The current version of AutoCAD is released on a monthly basis and is currently available as AutoCAD 2009, 2011, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, and on AutoCAD mobile.

In 2016, Autodesk announced AutoCAD 2018, an extension to AutoCAD 2016. Autodesk Architecture and Building Design is a separate subsidiary of Autodesk that produces a suite of applications, such as CorelDRAW for drafting and design. History AutoCAD was originally conceived in 1979 as a desktop version of AutoLISP, a programming language that had been developed at the University of Waterloo in Canada. Originally called "AutoPACE", the AutoLISP language was later renamed AutoCAD. AutoCAD has a number of language extensions, including AutoLISP, Visual LISP, VBA, and ObjectARX. AutoLISP was integrated into AutoCAD in 1984. It was originally the tool of choice for programmers, but its programming language is difficult to use and requires extensive training. To overcome this problem, Autodesk produced a free compiler called "ACE" that interprets the AutoLISP language to enable its use by anyone, and it works on all versions of AutoCAD from AutoCAD 1984 to AutoCAD 2015. AutoCAD shipped with the name "DWG (Drawing)". When Autodesk acquired Macromedia in 2000, they repositioned the tool as "DXF (Drawing Exchange Format)", which, besides being the filename extension for AutoCAD's native file format, also represented the unit of measurement, and was thus more accurate and useful. Historically, AutoCAD was a "D-I-Y" tool, with a company-developed and highly proprietary development environment, a dedicated corporate developer community and a company-developed web-based interface. Although Autodesk began to shift to an application-hosted service model in the 2000s, the first commercial package created for use with AutoCAD was a version of FrontPage, a Microsoft product. The first AutoCAD web-based solution was the d2 web plug-in, which allowed customers to draw directly on the web. The d2 web plug-in was a major product that later served as the foundation for AutoCAD Anywhere. The d2 web plug-in was based on the Eclipse software development environment and the Java programming language, making it different from other AutoCAD software. It was very successful, but only for a limited set of people and customers, since the product was designed as a web browser plug-in. The d2 web 5b5f913d15
