The Thing 3 is a 1993 video game based on a film of the same name. The game was developed by Paking Software and published by Eidos in 1993 for the DOS. It is an action game, with an over-the-top theme. There are a lot of funny characters and both sides of the story. The terrorists are represented by negative characters and the government side by positive characters. Parties include involved Psycho-Pass, Bionic Tiger, Los Lobos, The Truth, Ghost, and the Dinosaurs. A new, unexplained "Dinosaur" concept appeared in the expansion of the game which added the game's third protagonist. It was introduced in the beginning of this game, but later was seen again. A voice actor from the film was used to talk to players. The character used from the original film has since been replaced by a new voice actor. Also, the game has a unique gameplay system of a single level. The player must control the protagonists with one hand as the other hand is controlled by a joystick, and plays by joypad. In addition to the main plot of the film, the players must control as many characters as possible to accomplish their quest. Stages in the game provide rewards for completing quests and are usually located in secret rooms or underground passageways, guarded by enemies.

If you defeat a monster, a new character and a bounty is presented
