Item #: 01 Price: \$24.95 \$24.95 Availability: Usually ships in 1-2 business days Quantity: Notify me when back in stock VideoThang is an application which enables you to create video files and share them with your friends. Users of any level can seamlessly work with this program. The interface of the tool is simple and easy to navigate through. You can start off by adding files from the webcam, websites or your computer. So, you can apply few effects to the image (sepia, black and white, negative), add a caption, adjust the volume and trim the video. Furthermore, you can import an audio file as soundtrack and adjust its volume, add titles (e.g. whisper, left green, clip week) and transitions (fade in, fade out, cross fade). Plus, you can preview your mix and save it for a file, email, website or re-editing. The application takes up a moderate-to-high amount of system resources, includes a comprehensive help file for novices and didn't pop up any errors during our tests. On the other hand, videos can take a long time to load (depending on their size). But even so, VideoThang comes with very limited features. For instance, there are not enough effects and transitions included, and you cannot configure caption settings. The bottom line is that, although VideoThang can be easily used by individuals of any level, it's still not enough regarding a video creator. We suggest you look for something a little more advanced. A few days after it was purchased, I downloaded over 700MB of video files from my website using the VideoThang option to download video. However, the files were always left in their folders, rather than uploading them. I deleted them using Windows Explorer and deleted them using the program. The problem persists. While I can open the file(s) and play them, I cannot upload them. Any suggestions would be appreciated. When you "upload" your files it is
