Update: The problem in this case is the presence of the. (dot) in the search term. I used the following regex.*?. I notice the match is after the 4th letter of the word: $pattern = '/^.+?(?:“(.+)”|“(.*)”/s; preg_match_all($pattern, $raw, $matches); In this case of the HTML scraping the string came in as ?1") $3en · " \ " $3elf\ " \ " $3enlis!. $2en.2e $3en · " \ " $3enlis!. $2en." for .., the search string was sufficient I guess. Q: how to use if statement in bash script #!/bin/bash start_number=$1 stop_number=$2 end_number=$3 while true do if [$start_number!= $end_number] then /Applications/XAMPP/xamppfiles/bin/php -f /home/ben/XAMPP/htdocs/sample/run.php $start_number echo "hi" fi sleep 0.5 done I want to run a script with the user entering start and end number. But if start number is greater than end number the script should start and stop at the respective numbers. for eg I want to execute the script like this. ./script.sh 10 20 30 and the script should stop at the respective number. A: There is no need for while statement. #!/bin/bash start_number=$1 stop_number=$2 end_number=$3 if [$start_number == $end_number] then /Applications/XAMPP/xamppfiles/bin/php -f /home/ben/XAMPP/htdocs/sample/run.php $start_number echo
