# C4D - 10 Asset Table - Tutorial Summary: 1. The 3D models of the objects in

---

the scene are shown under the scene. You can reposition and scale the objects by using the selection handles that appear. This asset table behaves like the 3D view in other art apps. 2. The viewport tool is used to switch from the 3D view and use a 2D viewport window. 3. The 3D Viewport tool presents a panel of tools that you can use to select, edit, transform, hide, and delete

---

objects in the scene and the object hierarchy. 5. All the editable objects are listed as one or more objects in the part tree. You can change the order of parts in the part tree by drag and dropping them. You can also add or remove parts in the part tree. 6. You can change the object tags in the part tree by using the arrow key or simply by selecting an object in the part tree. You can change the object tags by double-

---

clicking on the name of the object, or you can use the + and - sign buttons to select objects and their tag. You can also delete the selected tag by pressing the Del button. 7. Object display in the part tree can be changed. You can use the zooming tool to change the level of detail of the scene displayed in the part tree. 8. Objects in the scene can be shown or hidden by using the command icons. You can show or hide the entire

---

scene or only selected objects or objects in the hierarchy. 9. You can show only those parts of the scene that you want to work on, by using the command icon. 10. The object hierarchy in the scene behaves like the viewport tree in other art apps. You can rearrange the objects in the hierarchy by using the up and down arrow keys or the down and up arrow keys, and you can move an object in the hierarchy by

---

selecting the object and pressing the Move button. You can also drag objects from one object group to another group. 11. You can expand or collapse the entire hierarchy of objects in the scene by using the command icon. 12. You can use the zooming tool to see and work with small objects in the scene. 13. You can control the tilt of the scene by using the tilt tool. By default, the tilt tool is displayed when you click
