Prevalence of periodontal diseases in elderly Germans: results of a population-based study. This paper describes a population-based study of periodontal diseases in elderly Germans with a special focus on (a) the prevalence of untreated periodontal disease (PD) in a general population and (b) the prevalence of PD in a clinical sample of elderly patients with or without PD. Periodontal diseases, including periodontal attachment loss, periodontal pocketing, and calculus, were recorded in the gingival tissue of 447 people ranging in age from 65 to 81 years. Data were obtained from a random sample of the national population in Germany (NIDR Study) and from a sample of 958 patients at 2 senior institutions. The data were statistically analyzed using ANOVA, chi 2, and trend analysis. The mean periodontal pocketing prevalence was high (35.5%), and calculus prevalence was also high (34.3%). Only 10.0% of the periodontal pockets had been treated by a dentist in the past 12 months. The prevalence of untreated PD increased from 10.4% in the 65-69 years age group to 41.7% in the 75-79 years age group. A clear trend toward increasing PD prevalence was found, with the highest prevalence in the 75-79 years age group. Differences between dentate and edentulous participants were significant. The most frequent sites of PD were the maxillary anterior area (35.7%) and the maxillary posterior area (31.9%). The gingival pockets of edentulous participants were more

severe than those of dentate participants (p The intersex man who was saved from a painful hysterectomy at the last minute and gave birth to his first son has spoken out in a bid to help other people in the same situation. Scott Perry, who was born with ambiguous genitalia, was 19 years old and living in western Sydney when he was signed by Newcastle Knights. The tough-tackling forward grew up in Wollongong and now plays with the Knights' women's team. "I

If you have a Kindle, you can download these free audiobooks online and listen to them on your Kindle. Serve the People Author: Bill Ayers This is the second in the series of seven audiobooks that Charles Lewis compiled from the teachings of Bill Ayers, the domestic terrorist turned co-founder of the Weathermen, a group he acknowledges regretfully helped to encourage violence against our own countrymen. Ayers calls for restoring our democratic institutions and revitalizing our participation in our country's politics. His vision is one of "a nation at ease with itself, at peace with the world" through "democratization." I strongly recommend Ayers's seven-part audio lecture. The Naked Communist Author: Bill Ayers This is Bill Ayers's classic text that has sold more than 2,000,000 copies, and serves as one of the primary references that has convinced many leftist activists and scholars that the official Obama narrative on the "birther" issue is the "truth." This is a

book to read before the release of the unredacted birth certificate Obama finally produced. On The Disillusionment of Left Populism in the United States Author: Ralph Miliband This is Ralph Miliband's treatment of the rise and fall of the radical "left populist" movements of the early 20th century in the United States. He argues that these events preceded "the rise of fascism" and "led to … the fall of socialism." He concludes that the only real alternative to the current centrist and Right-wing policy of our time is a "radical Center-Left approach." Children of Empire: The United States and the Holocaust Author: Paul Bucha Paul Bucha, the former US ambassador to Czechoslovakia, has written a touching and thought-provoking memoir of his own experiences as a child of World War II. Bucha and his family were rounded up and sent to a camp in Poland in 1939. Bucha died in 2003 at age 95, but fortunately, his family succeeded in publishing Children of Empire, which is widely considered to be the definitive scholarly study of the connection between the German concentration camps and our own history. The Coming of the State Author: Noam Chomsky This is an examination by Noam Chomsky of the nature
