## Media Digitalizer

Easy to use, Media Digitalizer will record your media in professional quality formats. It will also make the songs you record more compatible with modern music players by making them into MP3, WMA and Wave file formats. There are three recording modes in Media Digitalizer: Voice, Standard and Record. The settings you provide to record from the mike, your CD player or other media are different for each of these modes. A basic understanding of these differences will enable you to achieve the best possible recording results. There is also an Edit and Import section if you want to do your own editing of your recorded songs. Some of the most commonly used features, like the automatic selection of CD tracks, the editing and multi-channel support, are available in all modes. Create CDs, VCDs and records from cassettes, CD-Rs, CD-RWs, LPs, LPs-R, tapes, video and more Record audio directly from your microphone, sound card, tape deck or CD player Capture your first album in high-quality MP3 file format Get rid of scratched or missing tapes and CDs Records can be made into standard A, AA, AAA, AA and A format You can use Media Digitalizer with an audio card, a microphone or a line-in or analog-in connector of your computer • playback • export • import • recording • multi-channels • edit • audio converter 1. Saving your media in cd format Start Media Digitalizer by clicking Start Recording or clicking here at the menu bar. The first window that you will see is Media Digitalizer Settings. Provide basic information about your recording and click OK. In the Media Digitalizer Settings window, you will find a number of tabs. These are described below. If you have any questions about the Media Digitalizer Settings, please feel free to contact us. The first tab of the Media Digitalizer Settings window is the Recording Tab. Click it if you want to record to a CD or record a CD using the CD player of your PC. The Recording Tab: You will need to provide Media Digitalizer with information about your CD player. You will also need to set some basic options. Input: Select "Line-In" if you want your microphone to record audio from an input. Select "Microphone" if you want to record audio from a

## What's New in the?

Use it to create CD's from cassette tapes. The Media Digitalizer software is a powerful and easy to use software solution for recording cassettes and making cassette to CD digital transfers. You'll be able to create your own portable compact disc (CD) players, so you can listen to your recordings anywhere. The Media Digitalizer features a tool for capturing audio from cassette tapes, records and other analogue media, making it easy to transfer your audio to CD and use your recordings anywhere. Similarly, you can also transfer your recordings to other audio and video formats by simply changing the settings on the software when you save them. The Media Digitalizer software offers a powerful visualisation function that allows you to examine your CD, tracks and chapters. You can change the tracks so that they play in either forward or backwards order. You can also drag and drop the audio from your CD tracks onto the Media Digitalizer tracks to synchronize them to each other. The software is a powerful one so it has many other advanced features, such as the ability to record cassette tapes via headphones (headphone monitoring) and to import and export your recorded CDs and MP3s to and from other software. Media Digitalizer is a program that allows you to convert your cassettes, records, etc. into a CD. It is very easy to use, and just requires you to select your cassette, record, or other analog media, and then press the record button. The program will start recording. It is super easy to use, just select your cassette, record, or other analog media, and then press the record button. The program will start recording. It is very simple and easy to use. Just select your cassette, record, or other analog media, and then press the record button. The program will start recording. At any point, you can stop recording, change the format to CD, change the speed, and all other parameters of your CD, before finally creating your CD. After that, your CD will be ready to play anywhere. You can use the programme for creating and transferring Audio CD's and for creating MP3 files for use with your computer. The Media Digitalizer Software is available for free download on the Internet. When you have recorded your cassettes to CD or MP3 with the Media Digitalizer software, you can listen to your songs by burning them into an Audio CD. They are very easy to use, which means you can create them
