Any File Delete

This is an easy-to-use application that allows you to delete one file at a time. Every file can be specified with their name and extension. While the application offers users to erase files that they have deleted previously, it cannot delete the files that have not been created yet. The developers behind Any File Delete have even thought of a special folder (named the "old" folder) that is periodically emptied and the most recent data is then moved into it. Therefore, you will need to use this utility only when your personal data are very important to you, as the "old" folder becomes a library with all your files. In order to make the process a lot easier, the developers have also added a help command for new users. The only drawback to this method is that Any File Delete allows you to specify only one file at a time. If you have a lot of files that you want to delete, you will need to use the uninstall or remove functionality. Any File Delete Features: This is an easy-to-use application that allows you to delete one file at a time. Each file can be specified with their name and extension. This tool does not allow you to delete files that have not been created yet. The developers behind Any File Delete have even thought of a special folder (named the "old" folder) that is periodically emptied and the most recent data is then moved into it. Therefore, you will need to use this utility only when your personal data are very important to you, as the "old" folder becomes a library with all your files. In order to make the process a lot easier, the developers have also added a help command for new users. The only drawback to this method is that Any File Delete allows you to specify only one file at a time. If you have a lot of files that you want to delete, you will need to use the uninstall or remove functionality. Recommended Any File Delete Windows 10 Overview Any File Delete is a software application developed by I.R. Technologies Limited. The main program executable is any.dll. The setup package is about 18.05 MB (19,561,769 bytes) when donwloaded. In comparison to the overall usage of the computer, this application consumes a moderate amount of resources.
