- Unicode Editor for Windows & Linux - Urdu Support - Unlimited Undo/Redo - Unicode - Export Text to PDF - Export Text to HTML - Unlimited Undo/Redo - Replace Text - Save & Restore - Copy & Paste - Cursor Change -... Free Unicode PDF to HTML/XML converter is a program which converts any PDF documents to HTML documents with inline images, and XML format for use on a web page. Supports for images, icons, video, flash embed, java script, and rich text. PDF to text conversion software is an extremely powerful PDF to text conversion tool. PDF to text

conversion software is more efficient than the manual mode and is used for the following purposes: • Bulk conversion of large PDF documents to text or HTML format. • PDF to text conversion from a computer or web-based interface for users who do not have access to a desktop PC. • Auto-save when software is closed. WinNero PDF to text converter is a simple and easy to use tool to convert PDF files to text files. The conversion process is performed in three steps: select your PDF files, select a directory and click convert to file. Hyperlinks have been around for years, but in the past they were always static and gave you no control over them. Nowadays, webmasters want to be able to give more information to visitors by allowing them to follow hyperlinks. HyperLinks [ ] gives you full control over the hyperlinks you create. You can use them to update pages, link to

directories or even create mailto links to email addresses. A simple to use and powerful tool for webmasters. AutoText allows you to create a screen shot of all your text, save the current document to a file and automatically read in a document from that file. It has been designed to work with Microsoft Word documents and has a GUI that will make it easy for anyone to use. With WindowClone, you can make your present window look like any other window. With different themes, you can make a clear difference between your present window and other windows. You can also make any window look like any other window. Do you have a heavy task list that you need to maintain? Ever get bored of updating your to-do lists manually? Todolist would help you to create, edit,
