ESET Mail Security For Microsoft Exchange Server License Key [32|64bit]

ESET Mail Security combines ESET Exchange Server Protection with the ESET NOD32 Antivirus and delivers high-end antispam and antiphishing protection against virus-based threats and advanced malware, while also filtering the incoming mail. The ESET Exchange Server Protection module can scan a mailbox for infected attachments and remove them before they arrive in the recipient's mailbox. The second module, ESET NOD32 Antivirus, scans emails and websites with advanced malware detection. The third component, ESET Web Protection, scans visited websites and warns the user about suspicious content. The ESET Mail Security is a powerful security solution for Microsoft Exchange Servers. Features: • Anti-malware protection • Antispam protection • Application of user-defined rules • Virus protection • Email client protection • Network-based protection • Immediate virus removal • Protection of individual mailboxes • Remote management of the ESET Mail Security • Mailbox protection on local and remote ESET Mail Security servers • Protection of a single mailbox from multiple servers • Support for multiple mailboxes and an autodiscover feature to ensure email client security • Advanced log management • Full support for Microsoft Exchange Server 5.5 and later • Anti-spam API • Rules management • Exchange email filters • Support for internal and external recipients • Configurable whitelists for spam filtering • Business-class features in the free ESET LiveUpdate • Remote administration from the control panel • Support for both local and remote email client protection • Support for all network protocols for POP3, IMAP and SMTP • Anti-virus and anti-spam/phishing protection • Filtering of mail and email attachments • Spam filtering based on filtering policies • Manual or automatic virus removal • Cleaning or quarantine of infected attachments • Antivirus functionality • Instant removal of suspicious content in emails and attachments • Protection against in-flight attacks • Antispam • Handling of mobile devices • Multi-platform support • Comprehensive documentation, manuals and help files Platforms: ESET LiveUpdate 4.0.186.x86, ESET NOD32 Antivirus 4.0.206.x86 Change history: Version 4.0.186.x86: This version includes: - A bug fix for compatibility with the Microsoft Exchange Server 2007 - Support for running Exchange 1d6a3396d6

ESET Mail Security For Microsoft Exchange Server License Code & Keygen

ESET Mail Security for Microsoft Exchange Server is a complete solution for protecting Microsoft Exchange Server from malware infection. It includes three protection modules: Antivirus, Antispam and Application of user-defined rules. ESET Mail Security can be used with any version of Microsoft Exchange Server from 5.5 to Exchange Server 2007. Antivirus: The Antivirus module detects viruses, worms and Trojans in files, as well as in email messages. It also protects Microsoft Exchange Server's administrator against a malicious code that he or she can receive via email and give it a meaning. The Antivirus module is similar to the Antivirus module of NOD32 Antivirus, and they use the same methods to detect malware. Antispam: The Antispam module controls the number of email messages that are automatically sent to the user. It works at the user's end and ensures that user does not receive unsolicited email messages. The Antispam module protects the user against malicious emails and even against phishing emails that try to steal personal information. Application of user-defined rules: The Application of user-defined rules module allows you to set rules that instruct ESET Mail Security to examine certain file types or email messages in order to identify malware or suspicious email messages. You can also customize the User Interface that informs users about the execution of new rules or about the removal of old rules. ESET Mail Security for Microsoft Exchange Server System Requirements: Microsoft Windows Server 2000, 2003 or 2008 (32-bit or 64-bit). Microsoft Exchange Server 5.5 or later. Minimum system requirements for ESET Mail Security 4.0 for Microsoft Exchange Server: Processor: 500MHz or higher Memory: 2GB or higher Signed in with the admin account for remote administration. ESET Mail Security for Microsoft Exchange Server Customer Questions: Q: What is ESET Mail Security? A: ESET Mail Security is an integrated solution for protecting the server-as-client. Q: How does ESET Mail Security protect Microsoft Exchange Server? A: ESET Mail Security provides three types of protection: Antivirus, Antispam and application of user-defined rules. Q: Does ESET Mail Security provide client protection? A: Yes, ESET Mail Security provides protection against Trojans and worms for users who open email messages from unknown senders. Q: Does ESET Mail Security protect individual mailboxes?

What's New In ESET Mail Security For Microsoft Exchange Server?

ESET Mail Security for Microsoft Exchange Server is a set of three applications that you install and manage from the web. This set protects Microsoft Exchange Server 2007 and later. In addition to protection of user mailboxes, ESET Mail Security also prevents installation of applications (reloaded from a network share) in client computers by checking the signature of the application in the executable. Features include: - Antispam: detects and removes spam and tries to prevent it from reaching users. - Antivirus: protects user mailboxes from malicious content, including email attachments. - User-defined rules: lets you decide what is allowed and what is not by configuring the rule base. - Rules are easily configured, using the built-in rule editor. - Exchange Server 2007 and later roles supported: the functionality is the same as in ESET NOD32 Antivirus. - Microsoft Exchange Server 2007 and later client roles supported: the functionality is the same as in ESET NOD32 Antivirus. - Synchronization: ensures that all new rules, signatures and detected content are downloaded from the server. - Windows client installer (.msi) included for support of other Windows products. - A dedicated help desk is also available. ESET NOD32 Antivirus 4 for Microsoft Exchange Server Description: ESET NOD32 Antivirus 4 for Microsoft Exchange Server is a real antispam product protecting mailboxes on

the mailserver level. It detects and prevents the installation of harmful applications on client computers as well as attempts to spread worms and viruses. ESET NOD32 Antivirus 4 for Microsoft Exchange Server protects your email by looking for the malicious signature in the file, before it reaches your email client inbox. It also has antispam features, including specific protection against worms and Trojans. In addition to protection of user mailboxes, ESET NOD32 Antivirus also protects user data by monitoring the computer to detect external attacks. ESET NOD32 Antivirus 4 for Microsoft Exchange Server is a multi-license solution that can be used either on a single server or in a cluster environment. In Microsoft Exchange Server 2007 and later, there are also server roles for client side protection (email client roles). This solution works with these roles, but requires the same license and other products. ESET Mail Security for Microsoft Exchange Server Features: Features include: - Antispam: detects and removes spam and tries to prevent it from reaching users. - Antivirus: protects user mailboxes from malicious content, including email attachments. - User-defined rules: lets you decide what is allowed and what is not by configuring the rule base. - Rules are easily configured, using the built-in rule editor. - Exchange Server 2007 and later roles supported: the functionality is the same as in ESET NOD32 Ant
