The 1,000,000-pound weight set a new world record. The 14,000 met with a spectacular failure. The watch dropped to the floor and broke apart. Eleven spectators and 42 newspaper reporters were slightly injured. For the first and only time in the history of the Lilliputian Games, there were no winners because no one in the room had earned the title given to any of the competitors because there was no tournament until later that evening. So, "the Championships" were thrown into confusion, and nothing much happened in the following weeks. The fate of the soldiers had little attention from the Victorian press, as they

were at least assured that their suffering would not have been in vain. Ironically, while the 4th soldiers had thought the experiment to be a success, the experiment actually proved fatal to them all. The Lilliputians decided to keep the soldiers but, back in London, the English government considered that it was not cost effective to
