Microsoft Phone Data Manager Crack + Free [Win/Mac]

Microsoft Phone Data Manager is a compact application that allows users to copy files from mobile phones to a PC via Bluetooth or USB flash drives, as well as synchronize contacts with Windows Live Contacts service. It features a clean and straightforward layout that displays all necessary options in a clear and intuitive manner. What's more, the program offers users the possibility to select the phone they want to connect to and choose the security status for the PC (public or shared computer, private or trusted computer).

Plus, you can synchronize contacts with Windows Live Contacts, provided that you have specified the username and password.

Furthermore, if you do not have an account, the utility helps you create one with just a few clicks. Microsoft Phone Data Manager is quite light on system resources, so it doesn't interfere with computer performance and doesn't hamper other applications' functionality. There aren't many configuration settings to tinker with, and for this reason even inexperienced users can set up the process with minimum effort. During our testing, we've noticed that Microsoft Phone Data Manager carries out a task quickly and without errors throughout the entire process. It handles data with ease and takes full advantage of hardware improvements, so it doesn't hamper the system performance. For your

convenience, the utility includes a detailed guide that teaches you how to back up your data from a mobile phone and how to synchronize contacts with Windows Live Contacts. Microsoft Phone Data Manager Features:

- Data manager that allows you to copy files from mobile phones to a PC via Bluetooth or USB flash drives.
- Import and export phone contacts and sync with Windows Live Contacts service.
- Import and export phone messages and sync with Windows Live Mail.
- Back up data from a mobile phone and synchronize it with the Windows Live Photo Gallery.
- Secure sharing of files between Bluetooth devices.
- Import and export phone calendar and sync with Windows Live Calendar.
- Backup pictures, music and video from a mobile phone and synchronize them with Windows Live Photo Gallery.
- Import and export media

content from mobile phones and synchronize them with Windows Live Photo Gallery. • Import and export phone data and back up the entire phone. • In case of Windows Live Contacts server failure, create new contacts from the backup. • Secure sharing of contacts between Bluetooth devices. • Export contacts from Windows Live Contacts. • Export contacts from Windows Live Contacts to other accounts.

Microsoft Phone Data Manager [32|64bit]

- Select the mobile device to connect to and the computer to sync with

- Make changes to the configuration settings

SYNCHRONIZE WITH WIN LIVE CONTACTS

After connecting your mobile device to the computer, Microsoft Phone Data Manager will display the following screen: On this screen, users will

be asked to create an account in the Windows Live Contacts service. **NOTE:** If you have not yet created an account in the Windows Live Contacts service, you will be prompted to do so after connecting your mobile device to the computer. After the account is created, a user will be asked to log in the account. Once the user has logged in, the utility will display a screen asking to choose the synchronization method. When the user chooses Public, the program will copy all the contacts in the device and the database of the Windows Live Contacts service to the corresponding folder on the computer. The utility will copy the photos and music, as well as the audio recordings, videos and text messages stored in the selected mobile device. Finally, the user will be prompted to choose the synchronization frequency. **NOTE:** During our tests, we noticed that

the phone's battery can be used for up to 2 hours before having to be recharged. The application supports the following wireless

mobile devices: iPhone iPod Touch
Samsung LG HTC Nokia BlackBerry

.NET Framework Requirements:

Microsoft Phone Data Manager can be installed on any system running Windows XP, Windows Vista or Windows 7, as well as Windows Server 2003 or 2008. The application is compatible with Windows
