AutoCAD is generally regarded as the de facto standard of CAD software, being frequently used by companies, governments, and other institutions. The application is used for design of many different types of objects, including physical and mechanical, civil, electrical and mechanical, architectural, landscape, geospatial, mechanical, automotive, automotive, furniture, building, residential, mechanical, and industrial products. Contents show] Home use AutoCAD is a desktop CAD application that runs on a computer with an internal graphics or text card. It contains a full engineering suite of tools and a powerful, flexible modeling environment. AutoCAD is available for Windows and macOS. AutoCAD LT, a less-expensive version of AutoCAD that includes certain tools not available in the full version, was also available until 2011. In November 2011, AutoCAD LT was replaced by AutoCAD WS. Since 2016, it has been in the process of being completely replaced by AutoCAD 2019. There are a few additional options available if the AutoCAD user wants to draw directly on the computer screen without using a mouse and a graphics tablet. AutoCAD is licensed on the basis of number of users, although you can purchase a licensing subscription for unlimited users. The web and mobile version of AutoCAD is called AutoCAD 360 and is intended for editing and viewing of 2D drawings on a tablet or smartphone. This is in contrast to the full desktop version which is suited for desktop computers and cannot be used on mobile devices. Carlos Tevez Is Off To Argentina To Ensure His Bench's Place In The Final Squad Carlos Tevez has been called up to the Argentina squad by coach Alejandro Sabella after his impressive performances with Lazio in the UEFA Champions League. The Brazilian-born 30-year-old is set to join the La Albiceleste camp in the next few days and will most probably play against Switzerland in Bern on Tuesday. Argentina are second in the qualifying group behind Spain, who are currently in the final match of their group stage. A draw would see them advance to the second phase of the qualifying stage, where the four best-placed teams in their group will qualify for the play-offs. Other teams in their group are France and Serbia. In an exclusive interview to ESPN, Lazio's El Globo Sport journalist Diego Novarese discussed Tevez's chances of playing and playing style, as well as his upcoming fixtures with Italy. "Carlos Tevez is very important for Lazio. He is one of the most respected strikers in Serie A and also one of the players with the best quality to play for the national team," Novarese said. "He is one of the most important players for Lazio. Since he came, Lazio has really improved a lot. He is a big player, he was a champion, he is charismatic and he is a very popular player."

Carlos Tevez (L) and Mario Balotelli (R) celebrate after scoring against Inter Milan during the quarter-finals of the Serie A football (Soccer) Italian league in Milan, Italy, on May 10, 2012. Tevez has already played three matches for Argentina and scored two goals. The last time he was called up was in November 2007, when he scored once for his side during a 3-1 win over Paraguay in Cordoba.
