Open Windows 10 Print window and click on . Sep 5, 2018 A: You can do this by printing on the front side only, if you are using the default printer driver. Just select Front-only printing option (see the screenshot below). The same printing option is available for online printing as well, using the same Print menu option. If you want to use default printer driver on other computers, for example your clients, you need to allow printing on Front Only option in the printer settings, so that on the client machine, it will print the same. 4bc0debe42
