A: Have you looked into trying the Offline Editor of Cubase? If you happen to visit La Grande in southeastern Oregon, your first impulse might be to hit the nearest park and enjoy the weekend. But park lovers might want to visit another Oregon destination. La Grande, with roughly 11,000 residents, is the largest city in Harney County, which shares a long border with Nevada and the high desert region of eastern Oregon. Through its relatively young history, the city has played a big role in the history of the West. Here's a look back at some of the events that have taken place in the city. Population: 110,000 1970: Border war with Nevada over new federal highway It's clear from the way Las Vegas just pulls farther and farther ahead in population that people don't really like to live along the U.S.-Mexico border. And that makes sense. But for the early 1900s through 1950s, the U.S.-Canada border was not nearly as heavily traveled. Part of the reason was the population along the border. For the first half of the 20th century, there was a small town with about 1,000 residents called Loon, located across the border in Saskatchewan. Loon is now called La Grande. At that time, La Grande was a pretty nice town; it was right across the border from Cheyenne, Wyoming. That's where Dr. "Doc" Eugene Lindell came from, the man who led the effort that saved Loon's population. He left a legacy of taking care of the miners of the Black Diamond Mining District that included La Grande. There were Chinese miners that were hired to put in the iron and coal, and Dr. Lindell helped make sure they were treated well. Historian Stephen Haber, who works at the La Grande Public Library and helped author the book "The West: Outpost of the World," says there was a lot of dispute over who owned the land. Eventually, Canadian officials realized the U.S. had a good deal of interest in the land. From 1949 until 1954, La Grande became the busiest port in the entire West. The demise of the mine in the late 1950s didn't mean that the town would go the way of Loon. It began to take off as a logging hub. By the 1980s, the timber industry had dwindled, and La Grande also began to
