Use the Markup Assistant feature to bring in feedback with the point-and-click ease of MS Word and make changes to your drawing using the software's dialog boxes without the need for creating additional files. (video: 1:50 min.) When you import a CAD file into AutoCAD, it does not automatically update. Now you can also send feedback to the original author by exporting the original drawing. (video: 2:42 min.) Markups Import and Markup Assistant and Point Additions are now available to all users. If you don't currently have a license, purchase one for just \$199. Rename, Reorder and Add Text with Dynamic Text in Renderings: You can now create unlimited dynamic text for your designs without the need to create a separate text file, and the text will update automatically when the view changes. (video: 1:09 min.) With the new Dynamic Text, you can now create and maintain unlimited text on your drawings that will be automatically re-ordered or added to the drawing. This eliminates the need to create and manage separate text files. (video: 2:18 min.) Raster and Vector Graphics Support for HTML5: You can now save your design documents as HTML5-based formats (e.g. .htm, .html). (video: 1:43 min.)
