AutoCAD Crack

An AutoCAD Product Key drawing set consists of an AutoCAD Activation Code application and drawing-related files, which are stored on a computer's hard disk drive (HDD), and optionally an active network drive (cited as NDD) containing drawing data, files, and data. An active network drive is an external HDD accessible by a computer, which stores AutoCAD drawings, and which is available for use when the computer is connected to a network. Typically, the active network drive is also available when the computer is disconnected from the network. AutoCAD is a paid software product, with the version number corresponding to the edition of AutoCAD for which the user has purchased a license. The AutoCAD version (edition) number is contained in the file name of each drawing file. AutoCAD is available for purchase directly through Autodesk, or through its reseller network. AutoCAD's file extension is .DWG, and the application program is contained in the file itself. Depending on the version of AutoCAD the user has purchased, the drawing files may be compatible with or unsupported by the older versions of AutoCAD, or they may be limited to an older file format. For example, AutoCAD 2013 and later editions only support rendering and printing of previous AutoCAD versions' formats. AutoCAD 2017 supports rendering and printing of the .DWG format, and the earlier formats are deprecated. When a new drawing file is created, the new .DWG format is created automatically, and .DGN and older formats are converted. A drawing may also be in a .DGN or older format if it is imported from an incompatible application or earlier version of AutoCAD. AutoCAD does not support some file formats, including notepad files, .chm files, metafiles, and .mif files. AutoCAD is available in two editions (versions), AutoCAD LT (basic) and AutoCAD LT Standard (deluxe). The distinction between the two editions is that the deluxe edition includes a number of additional drawing tools, features, and features. Both editions are available for Microsoft Windows and Mac OS X, and are licensed per drawing-file set, as opposed to a per-user, per-computer or per-hour limit. AutoCAD LT (basic) and AutoCAD LT Standard (deluxe) are licensed using two types of licenses: an annual, perpetual license for AutoCAD LT (basic) and a

Autodesk AutoCAD also integrates with Microsoft Office, allowing users to save documents to the drawing table and the Windows clipboard. The interface for AutoCAD and Microsoft Word allows users to create Word documents from AutoCAD drawings. It also supports a WebServices Interface for Web Services which are mainly based on SOAP and .NET technologies and allow users to manage objects, render documents, perform many functions in AutoCAD, create drawings etc. and retrieve objects like DWG files, drawings and other related information using WebServices. The service also includes a Plugin Manager which allows the development of Autodesk Add-ons for AutoCAD. AutoCAD and AutoCAD LT also included functions for the retrieval of drawing information and supports a RESTful web service API which allows users to create drawings from a URL. The service also includes a Plugin Manager which allows the development of Autodesk Add-ons for AutoCAD. History The origins of AutoCAD can be traced to the drawing system originally developed by Hologic for the control panel program, Multiplan. After Hologic was acquired by MSC Software in 1984, and then CadKey Software in 1987, AutoCAD and

AutoCAD LT were developed and released in 1991. AutoCAD LT (AutoCAD Literate) is a graphics application for two-dimensional drawing and drafting. It differs from AutoCAD primarily in its use of a graphical user interface (GUI) and in its support for several specialized 2D drafting tools. AutoCAD LT, developed by Autodesk, is generally less expensive than

AutoCAD (under US\$50) and runs on a single computer on a Windows operating system. Supported Windows versions

AutoCAD LT is available in the following Windows versions: Drawing files AutoCAD LT supports the following drawing formats: DXF, DWG, DGN, PDF and TPS. AutoCAD LT also supports the following image formats: JPG, JPEG, GIF, BMP and PNG. Advanced functions AutoCAD LT is compatible with earlier versions of AutoCAD, and it can import and export 2D and 3D drawings as well as edit any of them. Extensions and Add-ons There are a number of add-on programs that are available for AutoCAD LT. Most add-ons are freeware and a1d647c40b

NASHVILLE — The Tennessee House advanced a plan Tuesday that would let local governments impose a sales tax, as well as a state income tax, in addition to the state's 6 percent sales tax. House Bill 889 passed on a narrow, 70-56 vote, with five Republicans joining with all the House Democrats to reject the bill. It now heads to the Senate. The bill would allow counties and cities to impose a "local option sales and use tax." The proceeds would be deposited into a county or local government's general fund, to be used at the discretion of the governing body. The state sales tax would continue to apply on all other items, including items sold directly by the government, such as public health and safety, and those sold through the government's purchases. Related: Tennessee State Senate extends deadline to adopt legislation to repeal House Bill 796 Republican Rep. Ron Ramsey of Blountville said the sales tax could generate \$400 million annually in new local revenue to improve roads and fix up county buildings, among other things. Ramsey said he wanted to give local governments the opportunity to raise more money by taxing what they now can't. Rep. Steve Cohen of Memphis called it "a tax grab." "I'm not against a sales tax, but it needs to be an opt-in. And it needs to be temporary," Cohen said. "It needs to be looked at thoroughly and thoughtfully." Tennessee's 7 percent state sales tax is the nation's highest, according to the Tax Foundation. The state's top two income tax rates — 6.5 percent for individuals and 8.75 percent for corporations — are among the highest in the country, according to the foundation. The legislation also would eliminate the state's income tax surcharge on people earning \$1 million or more, in addition to repealing the gross receipts tax levied on retailers. The House also passed House Bill 796, which would repeal House Bill 796, which passed in June 2017 and raises Tennessee's income tax surcharge on those who earn more than \$1 million a year. That measure is now being debated in the state Senate. A bill that would increase funding for public education was also approved. House Bill 2331 would require the state to spend \$8,245 per student next year
