What's New in the?

ChapterMaker is a simple, lightweight utility that allows you to split MKV files into smaller parts and create the files on the fly. The utility also supports different ways of splitting files and allows you to import or create the video segments based on your preferences. The interface of the application is so small and simple that you can hardly get any wrong decisions using it. Nevertheless, it does not matter what your experience level is, as the app is easy to get around. The largest part of the UI is dedicated to the list of chapters, which you can search, sort and export them. Moreover, the program also includes a Words List Editor that allows you to use interjections in the chapter titles. It is worth mentioning that you should pay attention when you checking specific words as the application supports capital letters everywhere, including inside large words. After you start the app, it will guide you through an easy-to-understand wizard that will help you to import the video files from a selected folder on your PC. As a result, you will get a big list of all the videos that you can choose to split. You can either select one of the files or use the drag and drop function to add a new source. In addition, you will also be able to specify the file format that you want to use for the results. For instance, if you are splitting the video segments according to the year, then the program will accept files of MP4, WAV and WMA formats, while WMA is the default format. If you are split the segments based on your criteria, then you can use the search box to quickly find the file that matches the desired name or time. After you are done, you can set the name for each chunk and specify the time as well. Enables you to select the formats that you want to use for the output While the interface might look quite simple and straightforward, the utility does come with some useful features. First and foremost, it allows you to import the times and titles from free online sources. The program also features a Words List Editor, that allows you to use interjections in the chapter titles. Moreover, it is possible to set the file format that you want to use for the results, while MP4 is the default format. In case you have some difficulty choosing the right output file, you can use the drag and drop function to import the video files from a selected folder on your PC. The program also allows you to split the MKV files according to the time, year, etc. Verdict Rating: In the eventuality that you do not have time to watch an episode or full movie in a single session, then maybe you should consider breaking the video files in chapters so that you can easily switch between multiple segments.
