Shims Wallpaper Changer Crack

The application is simple, but yet highly efficient when it comes to changing the desktop wallpaper. Although this Windows application is called a Shims wallpaper changer, it does not have the same purpose as the one that comes with the utility. There are two main reasons for this. First, this one can change the desktop wallpaper only. The main purpose of the latter is to manage the desktop wallpaper, change the date or time and do other tasks. The shims wallpaper changer is highly stable, but it does not provide many options for changing the wallpaper, and it does not adjust the wallpaper when the computer's clock changes. Although the program does not create any files or alter the windows registry, we found that it loads the wallpaper to the desktop with a reasonable speed. It is also fast, and it does not freeze the computer. The app has a lot of room for improvement, but we can say that this tool is worth a try. Program Features: This software has a lot of features that make it unique. The main reason for using it, however, is to make you change your wallpaper. It does not have any other features. Ads, Shams, Horse Rugs, Stallions, Stables. Shims Wallpaper Changer is a small-sized and portable piece of software which comes in handy to change the desktop wallpaper in case the traditional method does not seem to work due to a virus attack or other event. This is its sole purpose, so it does not sport any other options beyond what's essential. Portability perks Since installation is not a requirement, you can drop the program files in a custom location on the hard disk and just click the executable to launch the app. Another possibility is to save a copy to a USB flash disk or similar storage unit, in order to run it on any PC effortlessly and change its wallpaper. Worth taking into account is that Shims Wallpaper Changer does not alter Windows registry settings or create additional files on the disk, so it does not leave behind any unnecessary files after its removal. Clear-cut interface and options The GUI is made of a small window that provides direct access to all available options. You can point out a JPG, JPEG, BMP, PNG or GIF image to set as wallpaper using the file browser only, since the drag-and-drop method is not supported. The photo can be previewed in the main frame; an example file is provided in the package for testing purposes
