Download the Logarithm and Antilogarithm Tables Pdf to Excel in PDF, TAB or DOC formats with Save as. The antilog is the inverse of the log. Logarithms with the antilog are the inverse antilog of the same logarithm. Customs and Border Protection on Thursday began publishing weekly reports on the number of immigrants caught trying to cross the U.S.-Mexico border, with the goal of helping explain the surge of families and unaccompanied children who have arrived in recent months. The first report, for example, details a spike of 6,023 "Family Unit Aliens" apprehended by Border Patrol agents in March, a nearly 3,000% increase from March 2014. A total of 70,639 family members were caught in the past fiscal year. In a separate report, the number of children apprehended by U.S. Customs and Border Protection (CBP) jumped by nearly 50 percent in just a few months, from 7,211 in October to 11,002 in March. The CBP report also reveals the apparent spike was driven almost entirely by members of a single Central American country, Guatemala, which saw more than 45,000 family members and unaccompanied children arrive at the U.S.-Mexico border in a six-week period in March and April. The agency said in a statement that "family units" were apprehended at a "record pace" from April 3 to April 9, when there were 5,064 arrests. Between June and October of last year, 2,785 unaccompanied minors were caught illegally crossing the border in the Rio Grande Valley, a 350% increase over the 1,346 children caught in the same time period in fiscal 2014. And between October and November of last year, Border Patrol agents caught 3,121 unaccompanied children in the El Paso sector of Texas, a 230% jump over the same time period in fiscal 2014. The number of family members caught between October and November jumped by more than 400% in the San Diego sector, from 5,636 to 16,546, and in the Tucson sector, from 16,147 to 37
