UZCuS api 4.0.2 gpsfix: from 0.4.3 to 0.4.4, now GPLv3+, safer and more extensible. It was a quiet Saturday at the Marlins Park training complex in Jupiter, Florida. Everything was running smoothly, save for the fact that Miami Marlins players were busy working out in the gym, their minds only on their next day's game. Cody Allen pitched in a simulated game. He was 0-2 with two strikeouts. "It was a lot of fun," Allen said after a team workout. "This is kind of what I had hoped it would be, although this was more of a true game-like activity." On Sunday, the Marlins will host a day game in their Major League debut. It will be a big, important first step in Spring Training. With their first official game scheduled for Friday night, the team was on a short schedule. But they felt it was necessary to get one day of pitching on the schedule. As Allen and other teammates continued to talk on Saturday, reliever Dan Jennings was playing catch with his son. Jennings was in tremendous shape to begin the 2018 season. The right-hander feels no added pressure to perform because he's in his second year with the team and it's a new season for him. He's going to compete in the rotation as the number five starter. If he starts well, he's sure to become the team's number four or three starter once Dan Straily and Jose Urena return from Tommy John surgery. Jennings wasn't sure who was available to play catch with on Saturday. He knew it wasn't his son. "(Infielder) Mallex Smith was throwing," Jennings said. "He's going to be the hot corner, is what I'm hearing." The Marlins' starting nine at the moment, including Allen and Straily, will be a combination of newcomers and returning players. There is still no timetable for Urena to return. So there is potential for some lineup shuffling. The Marlins have no clear-cut designated hitter and both Marcell Ozuna and Adeiny Hechavarria can play that position. They aren't locked
