If you're using Windows, the screen below will appear. If you're using a Mac computer, the screen below will appear. If you want, you can click on a blank spot on the left hand side of the screen to return the dialog box to its normal size so you can add new layers to the document. Otherwise, leave the dialog box as shown. Click on the OK button when the screen below appears. The dialog box closes and you'll see the New Layer dialog box with no layers active in your document. Click on the OK button on the new layers dialog box. Before you can do anything else in Photoshop, you'll need to add a new background layer to your document. Click on the paper icon that's located above the Layers panel in the Layers panel. (For additional help on what this icon represents in the Layers panel, refer to this post.) The paper icon in the Layers panel is represented with the following icon in the Layers panel: If you have the Layers panel collapsed, the paper icon will be: If you have the Layers panel expanded, the paper icon will be: The paper icon is an indicator of the background layer of your document. It's like a transparent canvas on which you can paint. It may be helpful to label it "background" or "layer." If you don't have a background layer when you create a new image, your new image will have a white background. While Photoshop Elements will allow you to add a background to your image, it won't allow you to colorize or tint your image once you've added it.
