Do you wish to create beautiful fractal art? Want to draw a flames fractal? Curious why the fractals are called fractals when they are not? Looking for realistic looking flames to help you create your own unique fractals? In this simple tutorial, we will teach you how to produce stunning fractal flames. The core purpose of the AeFlame plugin is to create a Cosmic Recursive Flame fractal. The fractal is a type of thing that looks when you draw it on paper. When you trace the fractal and look at the trace, there is no actually image of the fractal. The fractal appears to twist and fold over itself. I created this plugin to do all of the computer animation of this very difficult concept. What is a Cosmic Recursive Flame? A Cosmic Recursive Flame is actually a fractal like a mass of long thin branches that twist and fold over themselves. The branches bend and cross each other in complex ways so that the fractal appears to twist over and over and over. However, when you trace this fractal through some brushes on the paper, there is no image of the fractal. Instead, the fractal appears to twist and fold over and over and over. In this tutorial, you will learn how to create a cosmic recursive flame fractal and animating the fractal with AeFlame. What you will need to create this tutorial is: Adobe After Effects CS5 or newer. Step by Step Instructions: Open AE and import a project file. Open AeFlame. Open the Project Properties tab. There are 3 settings to set in the Project Properties. You will need to adjust these settings for your flame fractal to look good. You will need to adjust the Render Filters settings to look good. The settings are explained below. You will need to adjust the Settings of each layer you have. This is explained below. This tutorial is divided into 4 steps: Step 1. Create a simple random flame fractal Step 2. Rasterize the fractal to make it visible in AE. Step 3. Render the flame fractal using AE. Step 4. Adjust the settings on the Project Properties tab. Step 5. Create a new layer and adjust the settings to adjust the number of loops on the project. This tutorial is a review of creating a cosmic recursive flame fractal in After Effects. The tutorial

Features: - Recursive fractals animation - Intuitive interface - Full documentation - Export layered PSD for after effects and video projects - Precise control over the color and brightness of each fractal's effect - Beautiful preview window, giving you insights into the structures of each fractal - Various patterns to add to your video and after effects project - Full control over the color and brightness of the recursive fractals

Hi there, check out the below link. This is a fun and interesting story about why we should never quit our ODs. It is about a bee! Bye Bye America: Why We Should Never Quit Our ODs Were you planning on not getting up this morning? I mean, really...I don't blame you. Routine is a beautiful and powerful thing. Feeling like you don't have to face the pain of life is only comforting for so long. Don't get me wrong. I can't even begin to imagine what it's like to not have days with a backbone. And I certainly can't imagine what it must be like to feel like my innards are being ripped out of me with every passing day. When I lived in the desert of AZ and relished in my ODs, I could ride in that ODD and get that familiar daze going. What was that daze you asked? Well, it was the ability to disappear into your life completely. It was the ability to allow yourself to become numb to the world around you. It was the ability to slip into a time zone in which you no longer have to worry about the impact of living. When you live in this state, you never feel free or liberated. It's just an illusion. A good illusion. A refreshing one. An easy to achieve one, but also an impossible to live one. It is only when you are able to fully accept the idea of living in a state of numbness do you find the freedom that is alive beneath this facade. Unlike those who live in countries ruled by dictators, I always find a noticeable difference between b7e8fdf5c8

The fractal will render out multiple frames of animation within your scene. In addition, there are a variety of types of fractal generation. Additional fractal types include: Expansion – this fractal type generates a fractal based on a parametric object defined in terms of a distance scale as well as shape and size of the fractal. Branch – this fractal type generates a fractal based on a parametric object defined in terms of a radius of a sphere from which the fractal will branch out. Migration – this fractal type generates a fractal based on a parametric object defined in terms of a position of the fractal in space. I could go on. The list of available fractal types is amazing, and they are just some of the possibilities. With AeFlame, you can animate your fractals so that they smoothly morph into each other. So, you can have your fractals become denser, slower, faster, smaller, and become pink or blue. In addition, you can use several different types of fractal branching. And, you can have your fractals spin around in space, or turn into a sphere. Configuring a Fractal in AeFlame: To set up your fractal in AeFlame, click on the AEAE tab or by default, the AeFlame icon in the main panel of After Effects. Use the AEAE Fractal preset or you can load your own fractal into AeFlame. Both are available, and it will import the fractal into your project. You can also load and animate your fractals using the AEAD Fractal type or the more advanced AEAD2 type. AEAE Fractal Preset: In the top panel of AeFlame, you will see the AEAE Fractal Preset control. Use this to choose your fractal type and other settings. To open your fractal type and configuration control panel, double-click on the top panel. To use your own fractal, click on the file icon in the top panel of AeFlame. If you have a fractal package (.pfx or.zip), click on the file icon and then navigate to that file. If you have .ae3.zip, click on the image icon in the top panel of AeFlame and navigate to that image. Then, click on the open or download fractal icon in the top panel. After you navigate to the
