Videos recorded using the HyperMotion Technology in FUT 22 will feature a new dynamic camera system that tracks a player's movement with pinpoint accuracy, and allows players to look just like they are moving in real life. Creating a player's movements will be as easy as opening or closing their hands. FIFA 22 launches in North America on May 23rd for PlayStation 4, Xbox One, and Windows PC. Fans will have access to more than 4,000 new players with dynamic 3D models and realistic facial expressions for all FIFA Ultimate Team (FUT) and online seasons and online matches. In addition, fans will also have the ability to create their own players with the Create a Player feature and share them with their friends. HOW DO I CREATE A NEW PLAYER? The Create a Player feature allows players to edit and customize their online attributes, or attributes of their players can customize their attributes such as Strength, Agility, Speed, and Skill. Players can then assign these custom attributes to a player created offline or on the online servers. In addition to customizing the attributes of existing players, fans can also create their own custom "Trait Cards" that they can use to build a custom player. This feature has been added in FIFA 22 to help beginners create a custom player from the ground up that will suit their playing style. How do I create a new player? Go to Create a Player from the Main Menu and select Create a Player Start (or X/A) Select Tractic, Position or create your custom player or players. Select Create Player Press Y to set a player new player from the Main Menu and follow the instructions below to create your custom player or players. Select Create Player Press Y to set a player name Select Tractic Ard From the Main Menu and follow the instructions below. To start create your new Trait Card Section below. To start creating
