New enhancements in AI and defensive positioning. Players can now weave through your tight, compact defensive line and execute long passes. This in turn creates better counter-attacks and allows more space for teammates to operate. Touchline support built into the system. New crossing and dribbling mechanics. Defenders are more prepared to attempt tackles and close down interceptions and take risks when the ball is on the move. Crossing no longer creates long aerial passes and instead are used to set up attacks. Players can progress the ball to a new position more quickly, and the crossing run more often makes clear passes. New attacking moves, such as the off-ball through-ball, have been tuned to be more effective. Misfire in the attack is kept to a minimum. Players can control off-ball situations to further increase efficiency. Journeyman players are now more effective in the attacking third. Skill development goals have been adjusted to better match players' skills. FIFA 22 captures key moments that are integral to football's history. FIFA 22 also introduces all-new stadiums, including the all-new Camp Nou, the Camp Nou Mestalla, the Galácticos Stadium, and the breathtaking new San Siro. A first-of-its-kind "Team of the Week" feature introduces a new, dedicated card that lets you turn any player into your army of the week. Managing a team is more intuitive in FIFA 22 with the introduction of the UCL (UEFA Champions League). Now the tournament's governing body gets to decide who the best team is. New features such as PK (Penalty Kick) Review from a distance, as well as new celebrations and Sound FX. FIFA 22 is available now for Xbox One, PlayStation 4, and PC. A trophy system has been added to the game for the first time. You can keep track of your progress with the new World Tour, an all-new feature that will track your journey across the globe.
