Simple Indicator is a piece of portable software which is designed to show the popups and notifications of your Mac. One of the main advantages of this application is that it is fully free. While all of its features are completely free and open-source, Paddy also provides a support system for paid users. Excellent performance Although the app is designed to work in a portable way, it performed smoothly. The popups didn't eat up a lot of memory, didn't produce significant load on the CPU, and were displayed with lightning speed. Advanced features With the program you can quickly hide all unwanted windows from the Mac (applications that are not minimized, usually accessible in the background) by manipulating a few options. It also has the ability to show you which applications are currently running in the background. What's more, you can adjust the speed of the popups and notifications from 1 to 10, and tweak them so they are displayed at the same time. This makes it possible to avoid the unwanted interruptions when you are listening to music or reading a book. Minor annoyances There is no proper icon. Paddy is merely designed to look like a notification. What's more, it does not include an option for scheduling. Therefore, you must monitor these popups for yourself. What's more, the program lacks a help manual. You can browse the interface options only using the help buttons, which are placed in the corner of every window. Bottom line Paddy is a simple app designed to give you a preview of Mac notifications and popups on your screen. It is designed to show you various alerts, messages, warnings, tips, and alert sounds. With the help of Paddy you can easily hide the windows and find out which applications are running. The program is completely free, but you can also pay to get more features. Setting a scheduled task with a simple preference is a convenient way to run a function or utility program without effort. You just need to create a rule for them, save it, add it to the schedule and your work is done. However, this process is made easier and more effective with a Scheduled Task Manager Pro application. Intuitive design for novice users Scheduled Task Manager Pro comes with an interface that makes it as easy as possible to add, edit and delete rules for a task. Its interface consists of tabs for setting options, preferences and the rule itself. The options tab contains a list of all pre-defined activities, which you can use to assign them to a task. However, there are only nine activities available at the moment, and they cover a variety of functions and need to be unlocked. You can manually turn off some activities and select them to be run at a certain time of the day. For tasks with no specified date, you can leave the "Start time" field blank. Also, you can select a custom date and time, regardless of whether it's a fixed one or it varies per task. The preferences tab is where you can customize the task to your liking. It has a list of preferences which include the time of day, the programs to run and their arguments. Every activity also has its own configuration screen, where you can add custom options. You can assign the task to be executed by a user, change it's behavior, specify an optional prompt and background window, along with custom arguments, an optional title and description, the directory where the files should be saved and the script or batch file. A custom

schedule You can set custom dates and times for the task, as well as its start and end time. It's also possible to select a fixed or random task start time. In this regard, you can even force the rules to be launched during a predefined period of time. Optional scheduling You can add or edit the name of the task, the scheduled program and its command line arguments. In addition, the application lets you set the task to run repeatedly or cancel it after execution. It's possible to run the tasks with a different user or with a password, create and delete rules and adjust their priority levels. Scheduled task management With Scheduled Task Manager Pro, you can handle your scheduled tasks in a more organized way than other solutions on the market. It comes with a wizard to b7e8fdf5c8
